

B&W PROMICROL FINE GRAIN FILM DEVELOPER

- High grade developer
- Highly stable liquid concentrate
- Formulated for critical professional use
- For processing all general purpose roll and sheet, monochrome film materials
- Usable in all types of manual and machine processing units.
- Sharp, fine grain images
- Replenishable or "One-Shot" usage

EXPOSING FILMS FOR PROCESSING IN B&W PROMICROL:

Developing all films in B&W PROMICROL will produce a speed increase of one half to one full stop when compared to the manufacturer's rating. A further speed increase of one to one and a half stops will be achieved with most films if the published development times are extended by 20 to 50%. The exact E1 increase, obtained in this way, will be dependent upon the user's own method of assessment.

USE OF B&W PROMICROL:

APPLICATION	DILUTION
One-Shot Usage	1 + 9

DEVELOPING TIMES:

Producer	Filmtype	ISO	Min 1+9
