

ROLLEI RHC HIGH CONTRAST

Rollei High Contrast Developer RHC is available again.

Based on the original formula, we are pleased to be able to offer you this special developer for a wide range of technical applications. Rollei RHC can be used for developing films as well as photographic papers.

It is particularly suitable for processing technical and orthochromatic films as well as micro & repro films. A steep gradation is achieved with orthochromatic films.

With photographic papers, the RHC increases the contrast by up to one gradation level. Furthermore, the RHC can be used as a depth developer for two-shell development. It is also utilised to adjust the contrast of fix graded papers.

RHC is suitable for tray and tank processing.

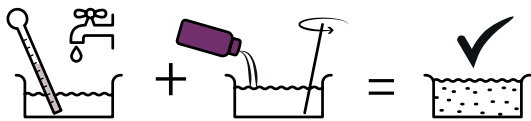

AVAILABLE SIZES

1000 ml

Dilution 1 + 4:

800ml water + 200ml RLC = 1000 ml working solution

Temp. 20°C / 68°F | agitate regularly

Noxious | Contains Hydroquinone | Irritating to eyes. Limited evidence of a carcinogenic effect. May cause sensitisation by skin contact. Possible risk of irreversible effects. **Keep out of the reach of children.** In case of contact with eyes rinse immediately with plenty of water and seek medical advice. Wear suitable protective clothing and gloves. If swallowed seek medical advice immediately and show this container or label.

APPLICATION	DILUTION	TIME (20°C/68°F)	CAPACITY (m ² /l)
Normal Contrast <i>Electronic Imaging film</i>	1 + 7	5 min.	3,5
Increased Contrast <i>Electronic Imaging film</i>	1 + 4	4 – 5 min.	2,5
High Contrast <i>RC & FB papers</i>	1 + 4	3 – 4 min.	1,4
