## Low Contrast Developer

**B&W PHOTO CHEMISTRY  
AT IT'S FINEST**

ROLLEI LOW CONTRAST developer is an special developer for technical film materials with very steep gradation. Based on developing time, these films can be used through bending of gradation, for normal photography purposes. The negatives showing a very fine grain structure, extremely high edge sharpness, and an excellent rich toning range.

---

250 ml Concentrate

---

**ROLLEI LOW CONTRAST  
#RLC12  
LP-DOCUFINE LC  
#LPF91**

Dilution 1+4;  
52 ml concentrate + 208 ml  
distilled (!) water.  
Processing not under 20°C,  
Agitation 30 seconds.  
Efficiency: 4 films per 250 ml  
concentrate.

ROLLEI LOW CONTRAST is more oxygen sensitive as other developers. Therefore, air must be squeezed-out from the open container, as much as possible. Small amounts should be refilled into a small dark glass bottle. Color of the concentrate should not be changed into brown color. Developing times of technical films must be figured individuell. Basic time figure is 6 minutes for a middle gradation. Any time extension, increases the usable sensitivity, and will steeping the gradation.
